

CF-ECO F9 Jet-Pulse. Central Extractor Filter. CF-ECO HEPA H13/W3 Jet-Pulse. Central Extractor Filter for Stainless Steel Welding.

CF-ECO F9 Jet-Pulse. Light Welding/Soldering Fume.

CF-Eco F9 Jet-Pulse is made for light welding/soldering fume and light dust. It is equipped with Jet-Pulse cleaning for the F9 cartridge filter (9m²) and built in fan with aluminium impeller. The air volume at the diameter 200mm inlet is ca.1400m³/h.

Jet-Pulse Cleaning of F9 Cartridge.

CF-Eco F9 Jet-Pulse has a built in pneumatic cleaning system. When the extraction volume has become too low you clean the Cartridge with the Jet-Pulse. Takes just a few minutes. Then take out the dust bin and empty it. The CF-ECO is now back to normal Extraction volume again.

CF-ECO HEPA H13/W3 Jet-Pulse. Stainless Steel Welding.

CF-Eco HEPA H13/W3 is designed as CF-Eco F9 Jet-Pulse but has a HEPA H13/W3 Filter Box (9m²) after the F9 Filter. It can be used for light stainless steel welding/soldering. The F9 cleanable Filter Cartridge works as a Pre-Filter and will increase the life time of the HEPA Filter. When the extraction is too low, even after cleaning the F9 Pre-Filter Cartridge, it is time to replace the HEPA filter.

Soldering/Light Welding.

1-2 Flexi d.160mm Extraction Arms or 4-8 Flexa/Chemikus Extraction Arms d. 75-100mm can be connected to the CF-Eco. The inlet diameter is 200mm. Use d.200mm Vertical/Horizontal ducting from the CF and go down with 160mm duct alternatively 75/100mm duct to the Extraction Arms. Ask our specialists for advice.

40 Years Experience!

The Plymoth products are a combination of well-proven technique and progressive new ideas. Plymoth is always a step ahead - but not expensive!
