

K-Mesa Backdraft-Table (1m or 1.4m) without Fan/Filter.

**Plymoth K-Mesa is a modern Workbench with Backdraft Extraction.
Prepared for Extraction Arm.**

Dust, Fume and Gases.

Plymoth K-Mesa is a backdraft workbench suitable for all works where dust, fume and gases are a problem. The contaminated air is extracted backwards from the working area. Nobody runs the risk of inhaling it.

Unique Funnel-shaped Extraction Openings with “Guillotine” Dampers.

The extraction is to the back through a backdraft box with vertical funnel-shaped openings. The horizontal “Guillotine” regulating dampers make it possible to adjust the width of the vertical openings from full open to closed. Always the right extraction speed. If a Flexi FLB Extraction-Arm (Separate Order) is fitted, you can divide the total air volume as you want between backdraft and extraction arm.

Extraction-Arm (extra equipment).

The extraction can be concentrated to a smaller area of the workbench with a Flexi FLB 1.5m Extraction-Arm. The arm is mounted on top of the backdraft box. If you need to reach outside the workbench a Flexi FLB 2m or 3m arm can be fitted. The side panels can be opened for long objects.

Strongly designed. Plymoth K-Mesa is strongly designed of 2mm and 3mm steel-sheet. It is as standard powder painted in white. The table height can be adjusted from 800-950mm. Suitable air volume for 1m wide table is 1300-1700m³/h and for 1.4m wide 1500-2200m³/h. K-Mesa shall be connected to an external fan or extraction system. Connection d.199mm(outside) for 1m wide table and 2x199mm(outside) for 1.4m wide table.

40 years experience of Design and Manufacturing at Your Service!

**The Plymoth products are a combination of well-proven technique and progressive new ideas.
Plymoth is always a step ahead – but not expensive!**
