JET-Cleaner

JET-Cleaner Filter Cartridge Cleaner

The JET-Cleaner is a machine that fast and efficiently cleans cartridge filters. It is made for cleaning Mobi-Flex and Wall-Flex filter cartridges (P-160). When the airflow has gone down too much you take out the filter cartridge and put it into the JET-Cleaner. It takes 3x10 seconds to clean the filter. Then put it back into the Mobi-Flex or Wall-Flex unit and the normal airflow is back.

JET-Pulse cleaning

The JET-Pulse cleaning system is a combination of normal backpulse and shaking. It is a very efficient and fast way of cleaning dirty cartridges.

100 times longer life

The JET-Cleaner will give your normal filter cartridges up to 100 times longer life. It is a substantial saving!

30 Years experience!

30 years experience of design and manufacturing at your service! The Plymoth products are a combination of well-proven technique and progressive new ideas.

Plymoth is always a step ahead - but not expensive!
