

MF-ECO HEPA H13/W3 Jet-Pulse. Stainless Steel Welding. Mobile Extractor Filter with Compressed Air Pre-Filter Cleaning.

STAINLESS STEEL Welding Fume.

MF-ECO HEPA Jet Pulse is a Mobile Extractor Filter with Pre-filter Cartridge (9m²) and HEPA H13/W3 filter (9m²). Total filter area 18m².

The unit has a built in Jet-Pulse Cleaning system for the pre-filter. No expensive replacement pre-filters needed! It can be cleaned over 100 times.

The economical solution for light Stainless Steel welding fume and light dust.

Jet Pulse Cleaning

The pre-filter cartridge (9m²) has up to 99% efficiency. When the extraction through the hood does not catch the welding fume, you connect the unit to compressed air with the included hose. You clean the pre-filter in a minute with the built in Jet Pulse system. Then open the door and empty the dust bin. Ready to use again!

HEPA H13/W3

The HEPA H13/W3 filter has over 99.95% efficiency. It is efficient against dangerous welding fume from for example stainless steel. When, after cleaning of the pre-filter, there is not enough extraction through the hood, it is time to change the HEPA filter box.

Flexible and economical

MF-Eco HEPA Jet Pulse is robust, yet the easily manoeuvrable wheels and the handles make for effortless transportation. Add to this the super-flexible Flexi Extractor Arm, and you have a supremely versatile and flexible filtration unit. It can easily be moved between different work stations.

40 years experience of design and manufacturing at your service!

The Plymoth products are a combination of Well Proven Technique and Progressive New Ideas.
