

Super-PM Extraction-Arm D.110/160 mm/ 1.5m 2m 3m 4m, with Hood and Handle of Mirrorpolished Stainless Steel.

Powder Coated Arm with Stainless Steel Hood and Handle.

The hood and handle of Super-PM are made of acidproof mirror polished stainless steel. The rest of the arm is powder coated

Smoke, Dust and Gases.

Extraction-Arms extract smoke, dust and gases directly at source, before the contaminated air has been inhaled by somebody. You will get better working environment all over the premises. Less dust in the air will mean less wear and tear of the machines and lower cleaning costs.

Chemical, Food and Pharma Industry.

Super-PM is made for using when controlling, measuring, weighing, filling, blending, mixing, emptying, packaging, etc. It withstands tough chemical environments thanks to the stainless steel hood and handle.

The Hood is the Secret. The hoods are developed in cooperation with one of the biggest companies in the chemical industry. The straight hood is for dust. The 67° hood is for smoke and the 150° hood is for gases. The 150° hood develops a "tornado" effect, which enhances its capacity to extract gases.

The d.160 mm models are intended for applications where 800-1200 m³/h are needed.

Perfectly balanced. External hydraulically suspended parallelogram arms make the hood incredibly easy to move and 100 % stable in all positions.
