

## Fika-Flex 500 “Clean-Air Shower”. Immediately 99.995% Clean Air “Where People Meet”.

**Fika-Flex is a “Clean Air Shower” for Coffee-, Lunch- and Meeting Rooms and Offices.**

Plymoth Fika-Flex is a HEPA H14 Extractor-Filter with a flexible arm with hose and diffusion hood. You can direct 99.995% clean air over areas “where people meet”. The contaminated air over and around a table will be “pushed” away. The area will immediately be almost 100% free of Dust, Virus and Bacteria. The Fika-Flex has the capacity to renew the air over the table once a minute. It will decrease the risk that people infect each other around a table. Less Colds or Flues will help any business.

**A Clean-Air Room at the same Time.** The Fika-Flex is immediately distributing 99.995% clean air where You want it. It is at the same time cleaning the entire room. After a short while the room will be 98-99% free of Dust, Virus and Bacteria. Fine dust is, according to WHO (World Health Organization), already today one of the main reasons for mortal lung-diseases.

**Draft Free Diffusion of Clean Air.** The 99.995% clean air is diffused from along the bottom side of the diffusion hood and is spread down over the table and the people around it. The cleaned air is colder than the air over the table as it is taken into the Fika-Flex at the floor. The fact that colder air is “falling” downwards create a draft free environment. The airflow can be adjusted from 0-500m<sup>3</sup>/h. The diffusion hood can be moved up/down horizontally and stays in position.

**The Fika-Flex is designed with 2 efficient Filters.**

1. F5 prefilter. Makes the HEPA H14 filter last longer.
2. HEPA H14 filter (8m<sup>2</sup>) with 99.995% efficiency. With certificate and leak test.

**Highest Quality and simple to use.**

The Plymoth Fika-Flex is designed in a very robust way of highest quality materials. It has a low noise level. 4 Heavy Duty Castors with Brakes makes it very easy to move. The Fan is equipped with an EC motor 1-phase, 220V with variable speed control. Just plug it in and get Clean Air.

**Profitable investment.** The Fika-Flex is paid back in a year as You get less sick leave caused by Colds and Flues. You also get lower cleaning costs as it captures particles and dust.

**Art. No.**
